Project Execution Steps:

1. Open SearchEngine project in Eclipse IDE.
2. Add below lines in web.xml of Tomcat server directory.

```xml
<servlet>
  <servlet-name>WebCrawler</servlet-name>
  <servlet-class>WebCrawler</servlet-class>
</servlet>
<servlet>
  <servlet-name>WebSearch</servlet-name>
  <servlet-class>WebSearch</servlet-class>
</servlet>

<servlet-mapping>
  <servlet-name>WebCrawler</servlet-name>
  <url-pattern>/WebCrawler</url-pattern>
</servlet-mapping>
<servlet-mapping>
  <servlet-name>WebSearch</servlet-name>
  <url-pattern>/WebSearch</url-pattern>
</servlet-mapping>
```

3. Clean and built project and Run on Server.
4. Project will run on default browser.
